[ghisalba.com](http://ghisalba.com)

- 1000V DC Rated operational voltage
- 32A Rated operational current
- 2- and 4-pole
- Oxydation proof contacts
- Cable cross sections up to 16mm<sup>2</sup>

Type	I <sub>th</sub> open A	DC21B 4 poles in series A	at U <sub>e</sub> V
LS16	16	16	1000
LS25	25	25	1000
LS32	32	32	1000

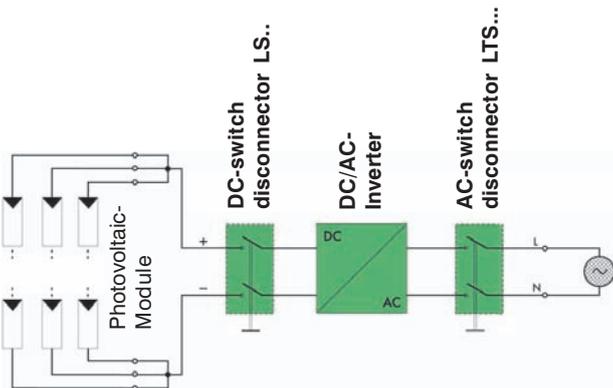

**DC-Switch Disconnectors**

Design	Panel mounting	Single hole mounting Ø22,5mm	Base mounting w. door coupling	Modular switch	Plastic enclosed

\*) Type-suffix for switch program: A 2 2-pole      Wiring diagram see below  
 A 4 4-pole

### Switch Disconnectors for Photovoltaic

Switch disconnectors „LS..“ are switch gears for interrupting the DC/AC-Inverter from the solar-panels. Photovoltaic-installations have to be equipped with DC-isolators according to IEC 60364-7-712.

Switch disconnectors „LS..“ ensures a reliable switching up to 32A with 1000V in the category DC21B.

The construction of the contacts and the material selection guarantee that no oxidation (small switching frequency) develops, and is thus prevented inadmissible heating-up.

The switch disconnector has 2, 3 or 4 contacts, by serial wiring of the contacts the contact rating will be increased.

The switching speed at the manually operated handle does not have an effect on the switching attitude of the contacts.

### Switching programs

Type	2-pole	2+2-pole 2 poles in series +2 poles parallel	4-pole	4-pole with jumpers Input on top Output bottom	4-pole with jumpers Input and Output bottom	4-pole with jumpers Input and Output on top
