Instrumentation cable for automation and process control systems for indoor installation. Installation also up on the cable shelf.

Structure:

- The conductor is a stranded, tinned copper wire 7x0,29 mm.
- 2-layer insulation, PE+LSZH.
- Two conductors are bundled together. Each pair is separated by a number printed on the insulation. In all pairs, the a-wires are orange and the b-wires are white.
- Two or four pairs are added together to form a block.
- The common protection is a plastic aluminum strip and tinned ground wire 7x0,29 mm. Outer jacket gray (RAL 7035), halogen-free, UV-protected fireproof material.
